SecurEnvoy The future of authentication

SecurEnvoy is pioneering the authentication space to meet the growing security needs of modern businesses.

Today's organisations need watertight security, particularly now that 'cloud computing' has empowered users to access data any time, from anywhere. However, they also need cost savings, optimum productivity and a renewed focus on environmental action. So SecurEnvoy's ethos is simple: Give control back to businesses and users without compromising on security or access.

Unlike traditional authentication solutions, SecurEnvoy's suite of products can be installed and integrated into existing IT systems quickly. And crucially, they avoid the need for much of the additional cost or remote deployment of the traditional approach to security software, creating an unprecedented zero-footprint solution while ensuring long-term cost benefits.

A global leader in business authentication, SecurEnvoy's products – SecurAccess, SecurPassword, SecurICE and SecurMail – have been adopted by businesses all over the globe.

By strengthening mobile security without breaking business budgets, SecurEnvoy helps you manage risk, maximise reward and retain control of your sensitive data.

SecurAccess Authentication for the modern business

SecurAccess from SecurEnvoy turns any mobile phone that can receive SMS into a ready-made authentication device. This pioneering zero-footprint solution cuts costs by using hardware that is already in circulation.

Unlike traditional tokens that take months to deploy and replace, SecurAccess can roll out more than 15,000 new remote staff per hour without the pain, cost or environmental impact created by legacy hardware distribution.

The solution fully integrates into Microsoft Active Directory, Novell eDirectory, Sun Directory Server and OpenLDAP. Integration is simple as it requires no additional databases or hardware – not to mention their associated cost.

SecurAccess also integrates with all leading remote access servers and web services including Microsoft OWA, Citrix, Juniper and Cisco.

There's also no need for extra software, eliminating costly and time-consuming testing and training schemes. SecurEnvoy has been designed to respond to the constant changes in mobile technology to ensure a competitive ROI.

Worried about network coverage or SMS delivery delays? SecurAccess is fundamentally designed to let you:

- Pre-load one-time passcodes
- Reuse session passcodes that change daily or after multiple days
- Request temporary passcodes through self-help website
- Obtain passcodes via email if necessary

SecurAccess is changing the game for business security. No tokens, no fuss… Just rock-solid, two-factor security on the move.

Benefits

- Strong, affordable, convenient
- Two-factor authentication
- No password reset or PIN management issues
- No token/smartcard deployment, renewal or replacement costs
- No additional devices, no software required on the phone
- Passcode always available even if temporarily out of communication

Requirements

- Windows 2003 or 2008 server with IIS installed
- SMS provision via modem with SIM chip or a web SMS Gateway provider
